NEW PRODUCT RELEASE

Roof Curb Installation Kits

Attic Breeze roof curb installation kits are now available to make installation of your curb-mount solar attic fan product as easy as 1-2-3. Engineered to fit seamlessly with our curb-mount solar attic fan products, our roof curbs are manufactured from zincalume alloy metal, offering superior strength and corrosion resistance. For added durability, Attic Breeze offers a heavy duty powder coated finish in your choice of black, brown, or terra cotta colors.

For ease of installation, Attic Breeze roof curbs feature the weatherproof Wakaflex® flashing system from Boral Roofing available in matching colors. The Wakaflex® flashing is offered in pre-cut flashing strips, designed to easily install with all Attic Breeze roof curb products.

Wakaflex® is a lead free, flexible, self-adhesive flashing solution ideal for all roof types and profiles. Additionally, if needed, Wakaflex® can be painted any color for a flawless match to your roofing project.

To save time and money on your next curb-mount solar attic fan installation, order our roof curb installation kit today! **For more information, call us at 877-288-4234 or visit us online at www.atticbreeze.net.**
